

# Automated Checkout kiosk

**LAPTOPSANYTIME**<sup>TM</sup>  
Automated Checkout Kiosks

# Automated Checkout Kiosk

Turn ordinary into  
**EXTRAORDINARY™**

Smart automated lending of laptops, netbooks (and soon other form factors) with member cards and PIN verification and/or credit cards allows facilities to break through the barriers that they face and deliver extraordinary access to technology.

All turnkey systems are plug-n-play, self-service and designed to scale with range of mix-n-match Starter/Host and Companion Stations.

Meeting the changing technological, operational, and management requirements at a given facility is accomplished via sophisticated back-end reporting software.

## Benefits

- Security**
- Scalability**
- Self-Service**
- Space-Saving**
- Sustainability**
- Powerful Back-End**
- Integration with Local Databases**

Unique in both design and technology, LaptopsAnytime's kiosk system reduces labor while serving as a logical extension to a facility's computing infrastructure.

LaptopsAnytime's kiosk improves access to technology and is a space saver. By having a series of unattended kiosk locations serving as multiple distribution points, you can bring "technology to the people" wherever they gather.

*See next page for detailed list of Kiosk models, specifications and dimensions*
